

To whom it may concern.

I was a person who said I would never pay to listen to the radio. You have to understand I spend about 50 to 55 hours a week on the road. One night one of my fellow drivers left his satellite radio in the truck and I thoroughly enjoyed it all night, I could listen to whatever I wanted and did not have to listen to some DJ. making rude or illicit remarks and some should not even be allowed on the radio, but in our politically correct world that we live in that is ok, even for the children who can just turn the radio on in the morning and hear just about any moron they want singing about things such as screwing their sister in law. All of them know who I am talking about, Howard Stern. Yes you can say that I am one of many that am sick and tired of morning talk shows, with idiots hiding behind freedom of speech and airwaves that should be censored and fined as well as taking off the radio. With XM I do not have to listen to any of that any more I can listen to my music of my choice, or news of my choice, or talk show of my choice if I so desire and not because I have to. My wife and I go for drives now with XM and can enjoy it, use to I would get so sick and tired of commercial after commercial I could scream, now I am commercial free. I still do listen to local programming, but I have a real good choice now. I do pay for my air time for my radio and am glad to because now I do not have to listen to false weight loss plans, and how to keep an erection the all natural way or sexual pleasure with your partner all the time. Besides if it was all natural it would be all natural and you wouldn't have to take all these all natural PILLS. I f the cowards of the NAB want to play baseball clean it up and lets play ball. The world was built on competition. So this being the case let them compete without their crooked lobbyists that are over payed and wake up to the fact that people are tired of listening to their trash programs all the time. FCC you need to tell the cry babies from the NAB to shape up or ship out.

I LOVE MY XM RADIO AND AM TELLING EVERYBODY ABOUT IT.

Jim R.
